Overview

Medicines play an important role in treating many conditions and diseases and when they are no longer needed it is important to dispose of them properly to help reduce harm from accidental exposure or intentional misuse. Below, we list some options and special instructions for you to consider when disposing of expired, unwanted, or unused medicines.

Transfer Unused Medicine to Authorized Collectors for Disposal

Consumers and caregivers should remove expired, unwanted, or unused medicines from their home as quickly as possible to help reduce the chance that others may accidentally take or intentionally misuse the unneeded medicine.

Medicine take-back programs are a good way to safely dispose of most types of unneeded medicines. The U.S. Drug Enforcement Administration (DEA) periodically hosts National Prescription Drug Take-Back events where collection sites are set up in communities nationwide for safe disposal of prescription drugs. Local law enforcement agencies may also sponsor medicine take-back programs in your community. Likewise, consumers can contact their local waste management authorities to learn about medication disposal options and guidelines for their area.

Another option for consumers and long-term care facilities, like nursing homes, to dispose of unneeded medicines is to transfer unused medicines to collectors registered with the DEA. DEA-authorized collectors safely and securely collect and dispose of pharmaceuticals containing controlled substances and other medicines. In your community, authorized collection sites may be retail pharmacies, hospital or clinic pharmacies, and law enforcement locations. Some authorized collection sites may also offer mail-back programs or collection receptacles, sometimes called “drop-boxes,” to assist consumers in safely disposing of their unused medicines.

Consumers can visit the [DEA's website \(http://www.deadiversion.usdoj.gov/drug_disposal/index.html\)](http://www.deadiversion.usdoj.gov/drug_disposal/index.html) for more information about drug disposal, [National Prescription Drug Take-Back Day events \(http://www.deadiversion.usdoj.gov/drug_disposal/takeback/index.html\)](http://www.deadiversion.usdoj.gov/drug_disposal/takeback/index.html) and to locate a [DEA-authorized collector \(https://www.deadiversion.usdoj.gov/pubdispsearch/spring/main?execution=e1s1\)](https://www.deadiversion.usdoj.gov/pubdispsearch/spring/main?execution=e1s1) in their area. Consumers may also call the DEA Office of Diversion Control's Registration Call Center at 1-800-882-9539 to find an authorized collector in their community.

Follow these simple steps to dispose of medicines in the household trash

MIX

Mix medicines (do not crush tablets or capsules) **with an unpalatable substance** such as dirt, kitty litter, or used coffee grounds;

PLACE

Place the mixture **in a container** such as a sealed plastic bag;

THROW

Throw the container **in your household trash**;

SCRATCH OUT

Scratch out **all personal information** on the

prescription label of your empty pill bottle or empty medicine packaging to make it unreadable, then dispose of the container.

Disposal in Household Trash

If no medicine take-back programs or DEA-authorized collectors are available in your area, and there are no specific disposal instructions on the label, such as flushing as described below, you can also follow these simple steps to dispose of most medicines in the household trash:

1. Mix medicines (do not crush tablets or capsules) with an unpalatable substance such as dirt, kitty litter, or used coffee grounds;
2. Place the mixture in a container such as a sealed plastic bag
3. Throw the container in your household trash;
4. Scratch out all personal information on the prescription label of your empty pill bottle or empty medicine packaging to make it unreadable, then dispose of the container.

Flushing of Certain Medicines

There is a small number of medicines that may be especially harmful and, in some cases, fatal with just one dose if they are used by someone other than the person for whom the medicine was prescribed. To prevent accidental ingestion of these potentially dangerous medicines by children, or pets, it is recommended that these medicines be disposed of quickly through a medicine take-back program or by transferring them to a DEA-authorized collector. If these disposal options are not readily available, it is recommended that these medicines be flushed down the sink or toilet as soon as they are no longer needed. Click here for a [list of medicines recommended for disposal by flushing.](#)

For example, patients in assisted living communities using fentanyl patches for pain should immediately flush their used or unneeded patches down the toilet. When you dispose of these patches and certain other powerful medicines down the sink or toilet you help to keep others safe by ensuring that these medicines cannot be used again or accidentally ingested and cause harm.

You may have also received disposal directions when you picked up your prescription. If your medicine is on [this list](#), and you did not receive information containing disposal instructions along with your prescription, you can find instructions on how to dispose of the medicines at [DailyMed \(http://dailymed.nlm.nih.gov/dailymed/about.cfm\)](http://dailymed.nlm.nih.gov/dailymed/about.cfm), by searching on the drug name and then looking in one of the following sections of the prescribing information:

- Information for Patients and Caregivers
- Patient Information
- Patient Counseling Information
- Safety and Handling Instructions
- Medication Guide

FDA remains committed to working with other federal agencies and medicine manufacturers to develop alternative, safe disposal policies. Below is some additional information about flushing medicine when it is no longer needed. If you have additional questions about disposing of your medicine, please contact us at 1-888-INFO-FDA (1-888-463-6332).

Medicines recommended for disposal by flushing: medicine and active ingredient

<i>Medicine</i>	<i>Active Ingredient</i>
Abstral tablets (sublingual)	Fentanyl
Actiq oral transmucosal lozenge *	Fentanyl Citrate
Arymo ER , tablets (extended release)	Morphine Sulfate
Avinza capsules (extended release)	Morphine Sulfate
Belbuca soluble film (buccal)	Buprenorphine Hydrochloride
Buprenorphine Hydrochloride , tablets (sublingual) *	Buprenorphine Hydrochloride
Buprenorphine Hydrochloride; Naloxone Hydrochloride , tablets (sublingual) *	Buprenorphine Hydrochloride; Naloxone Hydrochloride
Butrans transdermal patch system	Buprenorphine
Daytrana transdermal patch system	Methylphenidate
Demerol , tablets *	Meperidine Hydrochloride
Demerol , oral solution *	Meperidine Hydrochloride
Diastat/Diastat AcuDial , rectal gel [for disposal instructions: click on link, then go to "Label information" and view current label]	Diazepam
Dilaudid , tablets *	Hydromorphone Hydrochloride
Dilaudid , oral liquid *	Hydromorphone Hydrochloride
Dolophine Hydrochloride tablets *	Methadone Hydrochloride
Duragesic patch (extended release) *	Fentanyl
Embeda capsules (extended release)	Morphine Sulfate; Naltrexone Hydrochloride
Exalgo tablets (extended release)	Hydromorphone Hydrochloride
Fentora tablets (buccal)	Fentanyl Citrate
Hysingla ER tablets (extended release)	Hydrocodone Bitartrate
Kadian capsules (extended release)	Morphine Sulfate
Methadone Hydrochloride , oral solution *	Methadone Hydrochloride

Methadose , tablets *	Methadone Hydrochloride
Morphabond (extended release)	Morphine Sulfate
Morphine Sulfate , tablets (immediate release) *	Morphine Sulfate
Morphine Sulfate oral solution *	Morphine Sulfate
MS Contin tablets (extended release) *	Morphine Sulfate
Nucynta ER (extended release)	Tapentadol
Onsolis (PDF - 297KB), soluble film (buccal)	Fentanyl Citrate
Opana , tablets (immediate release)	Oxymorphone Hydrochloride
Opana ER (extended release)	Oxymorphone Hydrochloride
Oxecta , tablets (immediate release)	Oxycodone Hydrochloride
Oxycodone Hydrochloride , capsules	Oxycodone Hydrochloride
Oxycodone Hydrochloride oral solution	Oxycodone Hydrochloride
Oxycontin tablets (extended release)	Oxycodone Hydrochloride
Percocet , tablets *	Acetaminophen; Oxycodone Hydrochloride
Percodan , tablets *	Aspirin; Oxycodone Hydrochloride
Suboxone film (sublingual)	Buprenorphine Hydrochloride; Naloxone Hydrochloride
Targiniq ER (extended release)	Oxycodone Hydrochloride; Naloxone Hydrochloride
Vantrela ER , tablets (extended release)	Hydrocodone Bitartrate
Xartemis XR tablets	Oxycodone Hydrochloride; Acetaminophen
Xtampza ER capsules (extended release)	Oxycodone
Xyrem oral solution	Sodium Oxybate
Zohydro ER capsules (extended release)	Hydrocodone Bitartrate
Zubsolv tablets (sublingual)	Buprenorphine Hydrochloride; Naloxone Hydrochloride

*These medicines have generic versions available or are only available in generic formulations.

FDA continually evaluates medicines for safety risks and will update the list as needed.

List revised: April 2016

¹Consumers are advised to check their local laws and ordinances to make sure medicines can legally be disposed of with their household trash.

For specific drug product labeling information, go to **DailyMed** (<http://dailymed.nlm.nih.gov/dailymed/about.cfm>) or **Drugs@FDA** (<http://www.accessdata.fda.gov/scripts/cder/drugsatfda>).

Please check the **Medication Guide page** (<https://www.fda.gov/Drugs/DrugSafety/ucm085729.htm>) to see if a drug has a medication guide.
